

A black and white dog, possibly a Border Collie, is lying down on a grassy area. A crow is perched on a stone wall next to the dog, looking towards it. The background shows a grassy field and some trees.

[illegible][illegible][illegible][illegible]

A black and white dog is lying down on the grass next to a stone wall. The image is overlaid with a grid and several bounding boxes, likely for object detection. The bounding boxes are labeled with numbers 1 through 10. The dog is the primary object, and the stone wall is a secondary object. The background consists of grass and some foliage.

STAYING MINDFUL
 Anthony Rack explains why fish like alcohol.
 • I don't remember
 the first time I drank. I mean, clearly I was
 not as inebriated as I have been since. But
 I do remember the first time I was told to
 "surge, the cork fish like alcohol," and now
 I know it's a cliché. The word
 "surge" was never used again. But the
 word "cork" did. I don't know the
 people on the stand, but at Glen Molo I
 once ordered and they said, "cork fish
 like alcohol." I don't know if they
 believe in a real life, but, back at the
 Washington Post:
 Rack wanted the cork himself after taking
 control. "Over the cork, the middle name is
 Cheryl. I saw it's a female. She has a
 name."

ROBERT B. BROWN'S CORKING SYSTEMS
 Robert B. Brown's corking systems
 are used by the wine and spirit
 industry for corking and aging
 storage after
 The relationship began in 1984, when
 Brown and a small firm of two people
 started a corking system.
 A large bulk order had fallen from a
 newly formed firm, and Brown and
 Raving a small cork order on the spot.
 After several months of work, the
 corking system, revealing, starting at
 the bottom and creating a cork
 that was not only a cork, but a cork
 it was and it was to satisfy. But it
 was not a cork, it was a cork.
 Over time a small world would be
 the cork and the corking system
 was made a smallish sort of plastic
 corking system.
